This short ONE-DAY tutorial (10.00 – 16.00 GMT) has the following objectives:

1. To explain the underlying principles of the CIDOC CRM - particularly ontological commitment
2. To understand the overarching structure and logic of the CIDOC CRM. There is no need to memorize all the contents of the ontology, only to understand how it works, which is then applied consistently throughout the CIDOC CRM family of ontologies.
3. To apply this knowledge to specific examples.
4. To understand how to use the CIDOC CRM to address legacy data issues - diversity and inclusion.
5. How CIDOC CRM data knowledge graphs can be visualized and further manipulated.

Prerequisites

This course is for anyone interested in the objectives of the CIDOC CRM and providing context to data. There are no technical prerequisites.

Knowledge of cultural heritage, humanities practices, and/or research is useful but not essential.
